

APK FORENSIC ANALYSIS REPORT

Case File — Chain of Custody

Filename	C2demo.apk
SHA-256	dd5aa59d8e96338dcaf913bf69d16675d9831fe8d297fa553c0934a0d71977b0
MD5	12d82afdd7d5802681825ac0b55e7144
File size	5,836,768 bytes
Package	com.example.c2test
Report generated	2026-07-04 10:09:02 UTC
Tool / version	APK Threat Analysis Platform v1.0

VERDICT

Risk level: CRITICAL (score: 10)

Multiple strong indicators of active command-and-control behavior.

- **+4** — Suspicious code keyword(s): beacon, cmd=
- **+2** — Signing certificate issue: Signed with the default Android DEBUG certificate: Common Name: Android Debug, Organization: Android, Country: US
- **+2** — Cryptocurrency wallet ID(s) found: 1r7Y4hRSo4F1Esrbw5SdK9GHD3Q
- **+1** — Exported components without permission guard: activity:com.example.c2test.MainActivity
- **+1** — Hardcoded raw IP address(es): 127.0.0.1

APPLICATION DETAILS

- App name: C2 test
- Package: com.example.c2test
- Version: 1.0 (code 1)
- Min SDK / Target SDK: 24 / 36

DANGEROUS PERMISSIONS

None found.

EXPORTED COMPONENTS WITHOUT PERMISSION GUARD

- activity: com.example.c2test.MainActivity

EMBEDDED INDICATORS OF COMPROMISE (STATIC)

URLs (3)

<http://example.com/beacon>

<https://youtrack.jetbrains.com/issue/KT-67202>

Raw IP addresses (1)

127.0.0.1

Suspicious keywords (2)

beacon
cmd=

Wallet addresses (1)

1r7Y4hRS04F1Esrbw5SdK9GHD3Q

NETWORK BEHAVIOR (DYNAMIC)

Total HTTP requests captured: 0

Beaconing patterns detected:

No beacon-like patterns detected.

CORRELATION: CLAIMED VS. OBSERVED BEHAVIOR

Confirmed — hardcoded in code AND contacted at runtime (0)

None found.

Dormant — hardcoded but never contacted this run (0)

None found.

Unclaimed — contacted at runtime with no trace in static code (0)

None found.

SIGNING CERTIFICATE

- Signed with the default Android DEBUG certificate: Common Name: Android Debug, Organization: Android, Country: US
